

Schools Almost Out!

By Thapelo Sishi (Grade 7)

Greetings to all! I'm here to tell you about the school Craiglands! Personally I've never been a big fan of school but Craiglands changed my whole point of view. The activities here are so fun! But it's not all fun and games. It is a school after all!

I've made two very close friends here. They have always been there for me. That's another thing about this school. I guarantee the friends you make here will stick to you like super glue you whole life!

The teachers here really care about their students. They might be strict but that is because they care about the student's wellbeing and education. Speaking of which, teachers can only tolerate so much. Which is why they "provide" detention.

I'm a little scared to move on. This school has been with me since I was a little boy. But high school seems so exciting! The friends, the relationships and the academics.

My favourite time of year is the end of year concert. The time when we bid adieu. I'm excited for the spectacular, life-changing journey they call high-school.
